## SPA THERAPIES

### Massage

Massage therapy is integral to maintaining true body wellness. We offer a range of therapies for preventive care as well as therapeutic and relaxation treatments. Aromatherapy, deep tissue, prenatal, hot stone, and the exotic Royal Thai Poulitice Massage are among our most popular services.

### Body

We've searched the world to source only the highest-quality, effective detoxifying and toning treatments available. Unique to our spa is the use of organic algae mud from a wilderness conservation in Northern Ireland, the purest algae from the Brittany coast in France, and organic indigenous plants from the Andes. Our body therapies are delivered by highly-trained body therapists.

### Face

As one of a small number of select properties in the U.S. we are proud to partner with the luxurious Parisian product line Biologique Recherche. Our highly-skilled estheticians employ the Biologique Recherche clinical methodology, providing a transformative experience through pure ingredients and innovative procedures.
